

The Global Abortion Holocaust

Raul Reyes - President, Life Equip Global

The Bible tells us in Genesis 1:27 that we are made in the image of God. This includes babies in the womb. Babies in the womb, like all of us, are “fearfully and wonderfully made”.

It was John, in Elizabeth’s womb, who first recognized Jesus the Messiah while still in Mary’s womb. If babies in the womb are made in the image of God, then they are people, no less human than you or me. If they are people, then their lives are to be protected. Yet babies in the womb are under attack as no other people group. They are the most persecuted, least protected people group on Earth. In many countries, babies in the womb can be killed for little or no reason at all. In every country on Earth babies are being killed either through abortions or through other traditional means. And in virtually every country on Earth, Satan is seeking to make abortion legal for every and any reason.

Abortion - the intentional killing of an innocent baby made in the image of God while still in its’ mothers womb - is Satan’s greatest attack against the sovereignty of God. During an abortion, a tiny baby, who can often feel pain, is horrifically torn apart piece by piece. There can be no greater evil. Because of Abortion the world is currently facing the greatest destruction of innocent human life ever recorded in history. According to the Alan Guttmacher Institute, Abortion is taking the lives of approximately 56 million babies worldwide every year. That is equivalent to the population of South Africa, Italy or Tanzania - every man, woman and child - being killed every year!

In the United States, over 60 million babies have been killed since abortion was legalized in 1973. In 2015 a study found 15.6 million babies killed by abortions in India - the majority of them girls. The U.S. State Dept. reports 13 million babies killed by surgical abortions annually and another 10 million killed by abortion pills in China. There are a reported 8.2 million children’s lives aborted in Africa every year. An estimated 6.6 million people are aborted in South America annually. The lives of one in five babies around the world are ended by abortion, and in Europe the number is one in three babies lives ended by abortion.

Holocaust is defined as “destruction or slaughter on a mass scale”. The killing of one in five babies created in the image of God around the world can only be described as a

Global Abortion Holocaust. This Global Abortion Holocaust is Satan's plan for death and destruction of human beings on a global scale.

Now that you know, the question is, what are you going to do about it?

Proverbs 24:11-12

Rescue those being led away to death; hold back those staggering toward slaughter. If you say, "But we knew nothing about this," does not he who weighs the heart perceive it? Does not he who guards your life know it? Will he not repay everyone according to what they have done?
